Hello good afternoon Robert, I hope you are having a great day. Thank you for your advice and for your recommendations. I will discuss it with the Project Engineer Austin Kano and we will keep you updated on what we decide to do. Again, thank you. Have a great day.

Hi Rodolfo,

Are you proposing to install it on top of a catch basin? The top (actually the whole structure) is considered an engineered structural element. If you intend to drill anchor bolts through the top to attach the Big Belly, you will need BOS (Sanitation: who maintains the structure) and BOE (Engineering: who designed the standard plan to build it) to approve your proposed work.

My recommendation is that you move it to be 3 feet away from that structure.

Hello good afternoon Joe, Misty, Austin and everyone on board on the project I hope you are having an excellent day. I just wanted to inform you that Austin and myself went to the field and drew a couple of measurements for the new location of the Big Belly Trashcan on N Ave 57 and Figueroa street on the North West corner. We consider meeting ADA compliance and took into account Robert Gutierrez suggestions as well. In the diagram you will see a better understanding of where we would like to place the trashcan. (NOT TO SCALE)

I would like to know if Joe, Misty and Austin are available to place the markings on Thursday September 28, 2017 at 9:00 A.M on N Ave 57 and Figueroa Street.

Can I have feedback on this so I can send an invitation Email to confirm the date. Thank you everyone and have a great day.
